Notes:

1. To receive credit for both BIOL 1190 and BIOL 1191, all courses indicated must be completed at the same institution (with a minimum C+ in each) and **must be completed within 5 years prior to the application deadline** in order to be considered for admission to Nursing. If you have completed the equivalent to BIOL 1190 only as indicated in the last column above, you can submit a transfer credit request for the coursework and potentially register for BIOL 1191 at Langara. **There is no guarantee that you will be able to register in BIOL 1191; it can be very difficult to get into the course particularly as a new student.**

2. Athabasca University does not currently offer a course that will receive credit for BIOL 1190/1191 at Langara. Athabasca's BIOL 235 is not sufficient.
